Gamble, Franklin W.

Mill Valley, Calif. A NOTE to

LIBRARY
RECEIVED
★ JAN 31 1952 ★
U. S. Department of Agriculture

Our Friends and Customers and all who have written to us during the past year requesting our price lists, suggestions or advise or order plants from us.

We have been making it a policy to send these lists to you ahead of our regular advertizing season in order to give you first choice and first chance of securing our offerings which are limited in number, before they are offered to the general Public.

Within this list you will find SEVERAL NEW HYBRIDS which we believe are OUTSTANDING and HAVE NEVER BEEN OFFERED BEFORE, and respectfully suggest that you reserve those you want now as the number available is very limited and we may not have any left to advertise to the general trade.

We do not recomend shipping Orchid Plants until the Winter is over and there is no longer any danger of damage to the plants in transit. Our Experience with shipments via Express during the past two winters has been unsatisfactory and the Express Company has written us saying they cant control the weather so we highly recomend that you let us set aside the plants you want and send them to you as soon as it is safe to do so. The early orders get the largest and best plants available.

In regards to Growing Orchids in the Average Home with the Proper Equipment and enclosed case for them, We certainly do not advise that you attempt it, in spite of what some Magazine Articals tell you.

ORCHIDS ARE NOT GERANIUMS. And most Orchids are native to sections of the World where there is very Humid air Conditions and Temperatures are more uniform than the average Home. Once in a very long time I find some one who is growing orchids, (I should say flowering Orchids) in their home but in every case I have seen the plants are not in as good condition as they would be if grown in a greenhouse of even a Wardian Case.

Orchids do not Grow without proper care no more than most other plants and it always hurts me a little inside to see someone take a plant home and slowly Murder it, even if they dont blame the Nursery man they bought it from. However they usually do blame him.

A good book on Orchid Culture will usually enable one to start off on the right track but EXPERIENCE must be acquired before you can secure the results you see at Florists and at the Orchid Shows.

I think it is a dirty shame that some growers are making misleading statements regarding the requirements of growing Orchids and are really hurting all, every one concerned with the business or pleasure of Growing Orchids. The More Orchids Suce\$\$fully Grown by those who do it as a hobby, the more Orchid Flowers the Florists will sell as more people see them and learn to appreciate their beauty and keeping qualities.

I am always glad, when my time allows it, to give advise or suggestions on any phrase of Orchid Culture but some people expect me to give them a complete course in orchid culture for the price of a postage stamp and frankly I cant afford to do that. If you want the names of any publisher of good orchid books Ill be glad to send them to you. And when you find a question which is not answered in the book, Ill attempt to give you as much information in answer to the question as I can.

In spite of what some people think, Most Orchid Growers are Not Millionars, they are just common everyday people.

Thanking you for your time required to read this and trusting that you will find something of interest which you will be able to grow successfully, I remain Sincerely

Franklin W. Gamble.

Our friends and customers and all who have written to us during the past year requesting our price lists, suggestions or orders for plants from us.

We have been taking it a policy to send these lists to you ahead of our regular advertising season in order to give you first choice and first chance of securing our offerings which are listed in number, before they are offered to the general public.

With this list you will find 2 VARIETIES OF ORCHIDS

which we believe are OUTSTANDING and HAVE NEVER BEEN OFFERED BEFORE and respectfully suggest that you reserve those you want now as they are available in very limited and we may not have any left to advertise to the general trade.

We do not recommend shipping Orchids in the winter months. Winter is over and there is no longer any danger of damage to the plants in transit. Our experience with shipments via Express is that they are safe and satisfactory and the progress very rapid. We are saying they can't control the weather so we might as well let you know as far as we can about the plants you want and send them to you as soon as it is safe to do so. The early orders get the largest and best plants available.

In regard to growing Orchids in the winter months with the proper equipment and enclosed are for them the necessary do not think that you attempt it, in spite of what some magazine articles tell you. ORCHIDS ARE NOT GERANIUMS, and most Orchids are native to sections of the World where there is very humid air conditions and temperatures are more uniform than the average home. One in a very long time I find some one who is growing orchids, (I should say flowering Orchids) in their home but in every case I have seen the plants are not in as good condition as they would be if grown in a greenhouse or even a Warden Case.

Orchids do not grow without proper care no more than most other plants and it always takes me a little while to see someone take a plant home and allow it to die. If they don't bring the Nursery man they bought it from. However they usually do plant it.

A good book on Orchid Culture will usually enable one to start off on the right track but EXPERIENCE must be acquired before you can secure the results you see at Florists and at the Orchid Shows.

I think it is a dirty shame that some growers are making misleading statements regarding the requirements of growing Orchids and are really hurting all every one concerned with the business or pleasure of growing Orchids. The few Orchids successfully grown by those who do it as a hobby, the more Orchid flowers the Florists will sell as more people see them and learn to appreciate their beauty and helpful qualities.

I am always glad when my time allows it to give advice or suggestions on any phase of Orchid Culture but some people expect me to give them a complete course in orchid culture for the price of a postage stamp and frankly I can't afford to do that. If you want the price of any publisher of good orchid books I'll be glad to send them to you. And when you find a question which is not answered in the book, I'll attempt to give you as much information in answer to the question as I can.

In spite of what some people think, most Orchid

growers are not Millionaires, they are just common everyday people. Thanking you for your time required to read this

and trusting that you will find something of interest which you will be able to grow successfully. I remain sincerely,
Franklin W. Gamble.

NEW ORCHID HYBRID

We Honestly believe this is the first time that this cross has ever been offered to the public, and probably the first time it has ever been successfully made. We tried unsuccessfully several times before we obtained fertile seed.

ONCIDIUM ROGERSII, (A very large flowered type) x Miltonia Spectabilis var. Mooreliana, the deep Purple flowered Variety.

Frankly we do not know what the result will be but it should be a valuable cut flower as both parents are good keepers when cut. We only have a couple of Hundred plants of this cross and we may not be able to secure fertile seed again as two attempts since this seed was planted have proved unsuccessful.

If you are interested in securing this novelty and being one of the few people owning a plant of it, we suggest you order it right away so you will not be dissatisfied.

Plants in 1½ inch pots with two or more bulbs at \$2.00 each.

Hybrid Miltonias

These are the large flowered varieties of PANSY ORCHIDS

Plants which have flowered for the first time at \$10.00 each
These are seedlings of English and French Hybrids and large flowered outstanding Species of Roezlii and Vexillaria.

Colors are variable even from the same cross so we will not be able to list all of the variations but will try to give you your choice in white with various colored markings and pink and lavender shades as long as they are available. Please state second and third choice of color when ordering.

Only Fifty plants of these available so order early.

Epidendron OBrienanum and Radican Hybrids. We have many colors and shades in Reds, Crimson, Orange-Red, Orange, Yellow, Lavender, Pink and other colors.

Collection of Three plants of different colors- Offshoot Plants ready to pot, Three plants for \$2.50..... Six plants for \$4.00 single Plants at \$1.00 each.

When ordering please state your choice of color and we will try our best to give you your choice of color but must retain the right to substitute colors if we are out of your choice of color.

These Orchids are among the easiest of all to grow and flower the year around for us here in California. The plants offered here should flower for you within the year.

Lycaste Aromitica

The Golden Nun Orchid

This is called the Golden Nun because the Petals are shaped like a Nuns Hood. Flowering Plants at \$1.50 and \$2.50 each.

FRANKLIN W. GAMBLE ORCHID NURSERY 62 Shell Rd. Alto
Mill Valley California.

We honestly believe this is the first time that this cross has ever been offered to the public, and probably the first time it has ever been successfully made. We tried unsuccessfully several times before we obtained fertile seeds.

ONCIDIUM ROBERTII (A very large flowered type) x Miltonia Spectabilis var. Macleanii, the deep purple flowered variety.

Truly we do not know what the result will be but it should be a valuable one flower as both parents are good keepers when out. We only have a couple of hundred plants of this cross and we may not be able to secure fertile seed again as two attempts since this seed was planted have proved unsuccessful.

If you are interested in securing this novelty and being one of the few people owning a plant of it, we suggest you order it right away as you will not be disappointed.

Plants in 1 1/2 inch pots with two or more buds at \$2.00 each.

Hybrid Miltonia

These are the large flowered varieties of PANTY ORCHIDS

Plants which have flowered for the first time at \$10.00 each. These are seedlings of English and French Hybrids and large flowered outstanding species of Robertii and Vestibularia.

Colors are variable even from the same cross so we will not be able to list all of the variations but will try to give you your choice in white with various colored markings and pink and lavender shades as long as they are available. Please state second and third choice of color when ordering.

Only fifty plants of these available so order early.

Epiphyllum GRIFFITHIANUM and Radiosa Hybrids. We have many colors and shades in Red, Orange, Red-Orange, Yellow, Lavender, Pink and other colors.

Collection of three plants of different colors - Glabrous Plants ready to pot, Three plants for \$2.50..... Six plants for \$4.00 single plants at \$1.00 each.

When ordering please state your choice of color and we will try our best to give you your choice of color but must retain the right to substitute colors if we are out of your choice of color.

These Orchids are among the easiest of all to grow and flower the year around for us here in California. The plants offered here should flower for you within the year.

Lycaste Atomaria

The Golden Sun Orchid This is called the Golden Sun because the petals are shaded like a Sun Hood. Flowering plants at \$1.50 and \$2.50 each. FRANKLIN W. GALBIE ORCHID NURSERY 25 Shell Rd. Also Mill Valley California.

DENDROBIUMS

Dendrobium Phalaenopsis. These beautiful spray type orchids grow under Cattleya Conditions but never should be dried out as severely as Cattleyas

We offer the Regular type of Dendrobium Phalaenopsis in shades of Lavender and Purple, plants flowering size in average height of 24 to 30 inches. \$ 5.00 --- 7.50 -- and 10.00 each depending on number of bulbs and leads.

We also have a few plants to offer of the Rare Dendrobium Phalaenopsis variety Compactum which produces flowers similar to the regular type but does not grow over 10 inches tall and is more suitable for growing in wardian cases. \$10.00 each

Dendrobium Gibsonii. We offer a few young plants of flowering size about 24 inches tall. These produce yellow flowers. Easy to grow. ----- \$5.00 and 7.50 each.

Dendrobium Hybrid Seedlings.

We offer two varieties of Nobile Hybrids, both of which should be easier to flower than the Nobile species is that is imported.

Dendrobium Nobile var. Cooksonianum x Dend. Superbum, very large dark purple variety. So far these seedlings have the upright growth of Nobile. The flowers should be much larger than Nobile and the plants more vigorous. Plants in 1½ inch pots \$1.50 each

Dendrobium Nobile x Dend. Hildebrandtii. This cross has been made before and is named Dendrobium Wiganianum. We don't know what the result will be but expect it to be very interesting and beautiful. Plants in 1½ inch pots at \$1.50 each.

Cymbidium Seedlings

We offer the following two Crosses which were made in Australia.

Cymb. Delphine. the cross of Ceres var. F.J. Hanbury and Lowianum var. Concolor. This Ceres is red colored and Concolor is greenish-yellow. Plants in 2 to 2½ inch pots at \$1.00 each. Community pots of 15 or more plants at \$10.00 per pot.

Cymb. Anthony x Cymb. Pauwellsii-special Red variety. This Anthony is a deep pink in color. Plants in 2 to 2½ inch pots at \$1.00 each. Community pots of 15 or more plants at \$10.00 per pot.

If you are interested in Flowering size Cymbidiums please write us for a special offer on what you want. We have many colors and types.
